<i>Launch Date</i>	June, 23rd, 2022	Aug, 9th, 2022	Sept, 15th, 2022

Environment Questions

- **How long will the IT Collect *Staging* environment (base url: <https://staging-itc-cpic.itdashboard.gov>) focus on BY 2023 submissions?** The existing IT Collect staging environment will contain the BY 2023 codebase through August 31st, 2022
- **Will the “by24cpic” base urls for the Vendor Submission Candidate and UAT persist beyond the start of the BY 2024 Submissions?** Yes, both environments will remain active with the existing base urls.

Upcoming Deployment

The IT Collect team's upcoming deployment contains the following items:

- Create the CDM System collection
- Ensure users can omit Risk Probability and Risk Impact for inactive risks
- Remove Name field from the Metrics collection
- Remove NIST endpoint
- Enable Service document timestamps to update following a related Metrics document update
- Ensure Performance Metric Feed does not erroneously omit data points
- Add "fundLock" field to the Submission Control resource response
