

## BY 2024 ITPFM VENDOR MEETING 3

### BY 2024 Policy Status

→ Based on continuous conversations with OMB and other relevant policy stakeholders, the IT Collect team is NOT anticipating any substantial policy-driven changes to the BY 2024 Submission Overview Document or the BY 2024 Vendor Integration Candidate. Both products should remain fairly stable for the remainder of the summer.

→ Known Vendor Integration Candidate changes:

- **Performance Metric Name:** The IT Collect team is removing the '*name*' field from the BY 2024 performance metric submission schema. The '*name*' field was not included in the BY 2024 submission overview document, and as a result, the IT Collect team will now remove the '*name*' field from the BY 2024 submission schema.
- **NIST Data:** Per a June 15th correspondence from the IT Collect team, OMB has formally removed NIST data from the BY 2024 ITPfM data collection. The IT Collect team is in the process of formally removing the NIST endpoint from the BY 2024 vendor integration candidate. However, in the meantime, the IT Collect team has disabled all agency NIST documents from the BY 2024 vendor integration candidate NIST collection.

### Known Issues

→ Based on vendor feedback and internal testing the IT Collect team is aware of the following issues with the BY 2024 vendor integration candidate

- **Erroneous Projects Rebaseline Mandate:** IT Collect is erroneously requiring rebaseline IDs when an existing project adds Planned Start Date, Planned End Date, and Planned Total Cost data for the first time during PATCH or PUT operations.
  - Issues Status: In Review
  - Anticipated Resolution: July 21st, 2022
- **Metric Feed Omitting Relevant Data Points:** IT Collect is erroneously omitting several data points from the performance metric feed for both authenticated and public users. This issues is isolated to the data feed, and has not impact the metrics collection or submitted data
  - Issues Status: Initial Analysis
  - Anticipated Resolution: Early August, 2022

### Delivery Timetable

- ✓ ~~April 29th, 2022: GSA released the BY 2024 ITPfM Draft Submission Schema to Vendors~~
- ✓ ~~May 4th, 2022: GSA released the BY 2024 Technical Addendum Guide to the Draft Submission Schema~~
